Subject: Question about test data from GM confirmatory tests

Dan,

I believe two GM vehicles have had official confirmatory tests performed in the hot test cell, vehicle 161HPV4323 (diesel Cruze FEDV) and **Deliberative Process (Out of Scope) / Ex. 5** The diesel Cruze I believe was the vehicle which had the void and variant due to the CO2 analyzer drift issue. The official results are in Verify, however, we have not seen/received the hard copy reports and GM is requesting copies (which is a typical practice). So, I am wondering if you have the official test results and if so can we get copies to forward to GM?

Deliberative Process (Out of Scope) / Ex. 5

Thanks,

David
